

iPhone User Guide to Zoom

iPhone Screen Captures of Zoom in Action

These images should help iPhone owners using Zoom in distance-learning courses or other activities. The guide is aimed primarily at students; teachers may not find all host functions presented here. These images are from a phone signed in to a meeting as a student.

Also watch

- YouTube, [How to Use Zoom Mobile App For Free Video Conferences](#)
- YouTube, [Using Zoom on your iPhone or iPad](#)

Compared to a computer or iPad, Zoom has fewer functions on iPhone, but enough for class attendance and participation.

Important Tip!

Zoom controls on all screens disappear a few seconds after you last touch the screen. Touch anywhere to bring them back.

Guides created by Gale Rhodes (OLLI)

Main Zoom Screen

Top of screen, left to right:

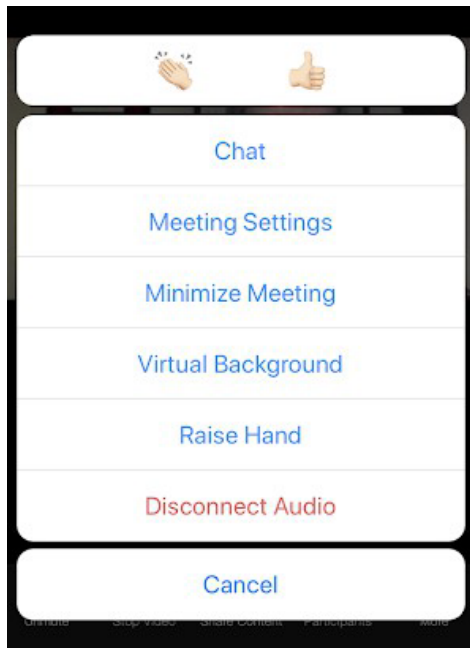

- Turn sound on/off
- Change phone orientation upright/on side
- Meeting ID and password
- Leave meeting

Bottom of screen, left to right:

- Mute or unmute your microphone
- Stop or start your video
- Share your phone screen with the class (if allowed by instructor)
- See a list of participants
- "More" produces a menu of options shown on the next figure

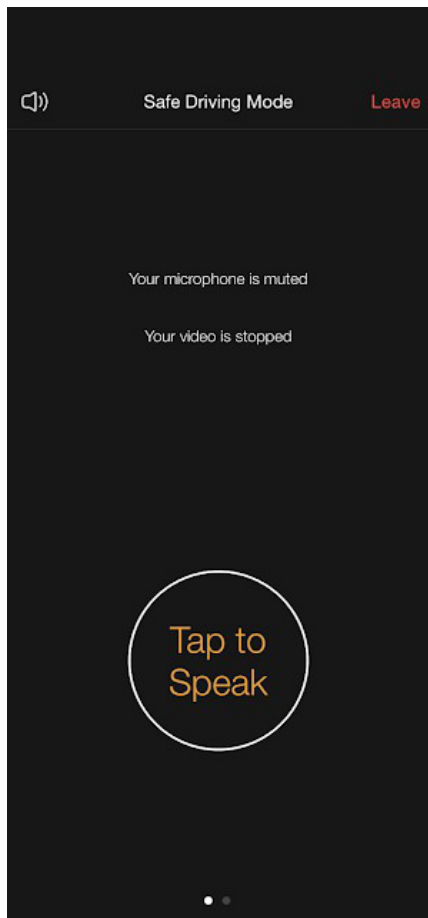

"More" Menu options running from top to bottom:

- Give a visible "reaction" to a comment or image (applause or approval)
- Start chat with another student
- Change meeting settings
- Make meeting image smaller
- Change your background in your screen image to a photo
- Raise your hand to get instructor's attention (wait to speak until called on)
- Back to Zoom Main Screen

Other functions

Swipe left, to get this screen:

Tap to Speak

When you touch the button, "Tap to Speak," you are unmuted, until you tap the button again.
