

# **iPhone User Guide to Zoom**

## **iPhone Screen Captures of Zoom in Action**

These images should help iPhone owners using Zoom in distance-learning courses or other activities. The guide is aimed primarily at students; teachers may not find all host functions presented here. These images are from a phone signed in to a meeting as a student.

### **Also watch**

1) YouTube, [How to Use Zoom Mobile App For Free Video Conferences](#)  
Watch the first two minutes for guidance on joining a meeting on your phone.

2) YouTube, [Using Zoom on your iPhone or iPad](#) (Listen to first 4 minutes.)

**Compared to a computer or iPad, Zoom has fewer functions on iPhone, but enough for class attendance and participation.**

### **Important Tip!**

Zoom controls on all screens disappear a few seconds after you last touch the screen. Touch anywhere to bring them back.

## Screen Images and Guides to Functions for iPhone Students on Zoom

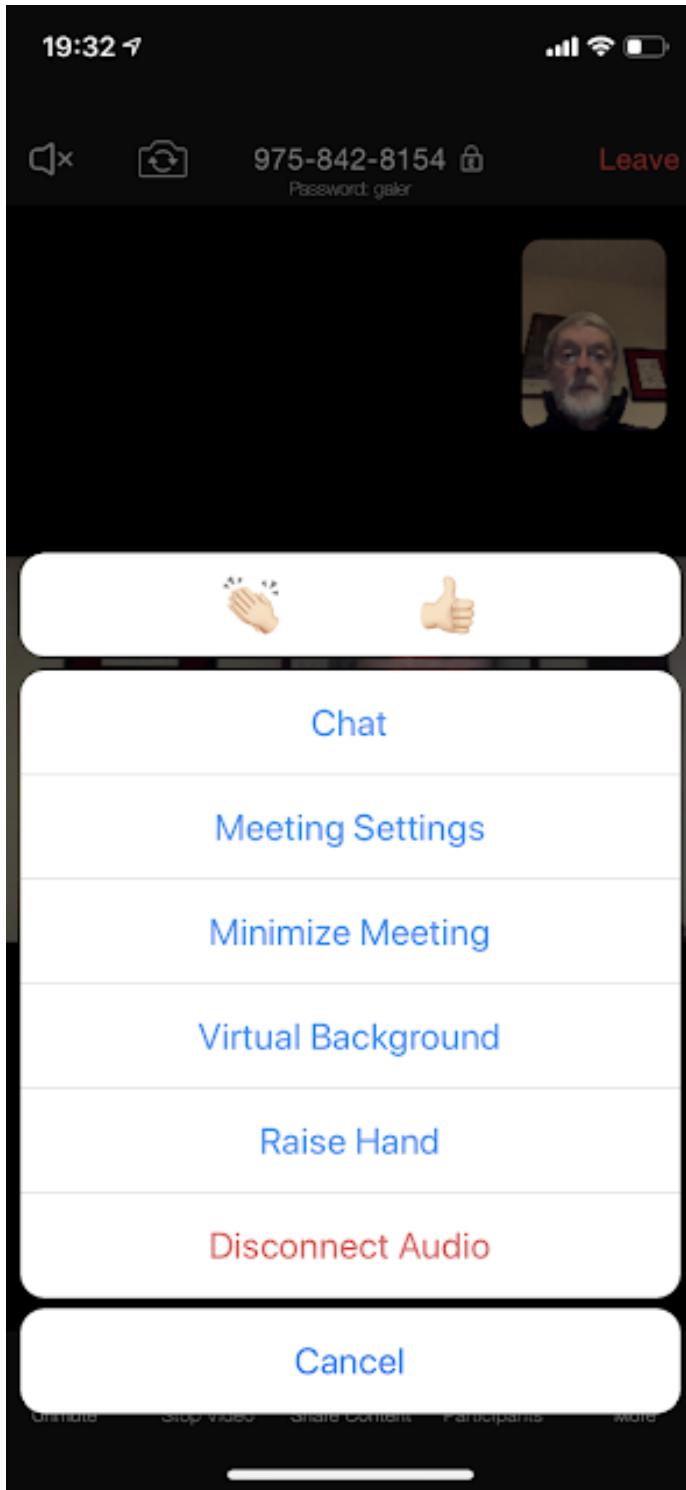

### 1) Main Zoom Screen

#### Top of screen, left to right:

- turn sound on/off
- change phone orientation upright/on side
- meeting id and password
- leave meeting

#### Bottom of screen, left to right:

- mute or unmute your microphone
- stop or start your video
- **share your phone screen with the class (if allowed by instructor)**
- see a list of participants
- **"more"** produces a menu of options shown on the next figure

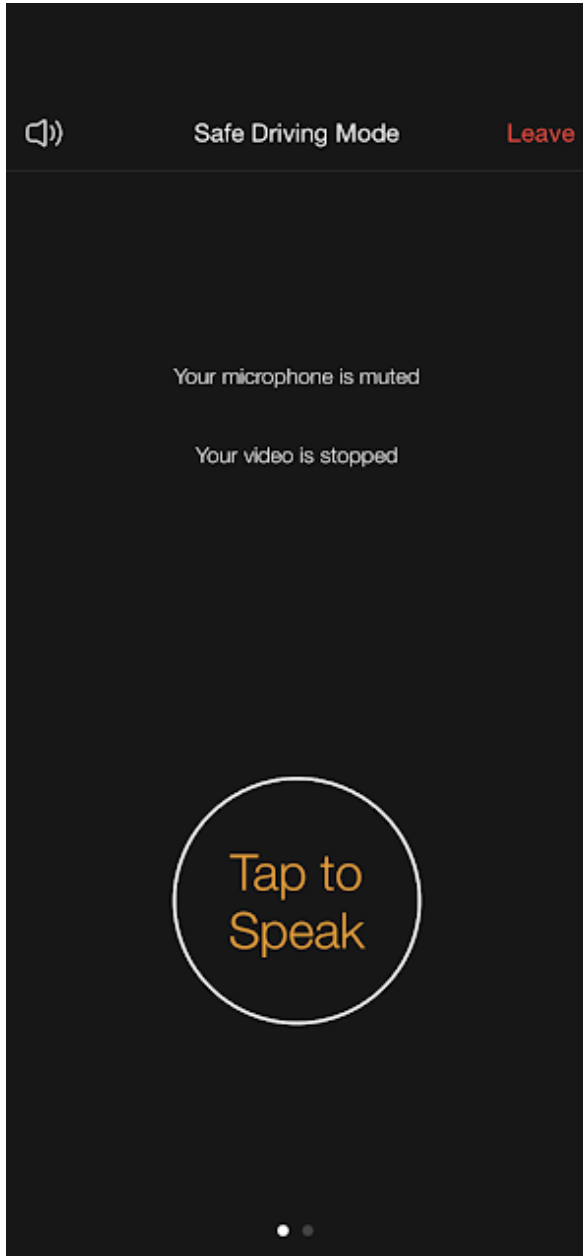

### Zoom Screen After Choosing "More" Menu options running from top to bottom

- give a visible "reaction" to a comment or image (applause or approval)
- start chat with another student
- change meeting settings
- make meeting image smaller
- change your background in your screen image to a photo
- raise your hand to get instructor's attention (wait to speak until called on)
- back to Zoom Main Screen

### Zoom Main Screen

For other functions, swipe left, to give this screen:

# Tap to Speak

When you touch the button, "**Tap to Speak**", you are unmuted, until you tap the button again.

REPEAT: Also watch
